

Perceptual Dynamics Datasheet

Study ID: SML908	Date: 7/12/18	Age: 19
Handed: R(L)	Footed: (R) L	Height: 171 171 cm
		Weight: 59.7 kg

1. Go over prep datasheet (before the subject arrives)
2. Calibrate cameras and set origin
3. Consent Form
4. Change into study clothes
5. Restroom?
6. Markers + EMG sensors. Test EMG sensor signals.
7. Harness + divider
8. Subject calibration
9. Enable treadmill remote control, arm nexus for automatic capture

Trial #	Condition	Notes
05	TM burn in 150 @ 1.05 m/s	

Main experiment: Perception trials

10. Explain controller and perceptual task to subject, including audio cues and keyboard keys
11. Give subject keyboard, noise canceling headphones and put on drape.
12. Introduce visual feedback for familiarization only.

Trial No.		Observations
05	Familiarization (with TV feedback)	
06	Perception - Baseline1	
08	Perception - Baseline2	
09	Perception - Baseline2 (again)	Waddles
10	Perception - Adaptation	
11	Perception - PostAdaptation	took 30 secs for trial to start

Sensor	Muscle	Observations
1	LTA	
2	RTA	
3	MLG	
4	LLG	
5	MRG	
6	LRG
